3/8" Reversible Drill

DP 5038

The DP 5038 features include a high powered motor for tough drilling in all materials. The durable sand cast housing together with all steel components give it a long service life. The DP 5038 includes an industrial Jacobs 22BA chuck, thermal handle protector and rear exhaust.

5" and 6" Palm Sanders

SP 3005-SP 3006

The SP 3005 and SP 3006 come standard with a 5" and 6" pads. Random Orbital sanding patterns provide swirl free sanding at 11,000 RPM. The SP sanders are light weight (less than 2 lbs) with a composite housing and very well balanced.

3" Cut-Off Tool

CO-4003

The CO-4003 Cutoff Tool boasts .67 HP and its 18,000 RPM makes short work of small cutoff jobs. The unique patented air regulator on top allows you to change the speed easily. Safety trigger and a rubber grip are standard.

Needle Scaler

NS 9005

The NS 9005 removes paint and slag from metal surfaces and welded joints. Specific attention is paid to the hardening of the piston, barrel and chisel retainer make the NS 9005 a very durable and repairable tool. The NS 9005 has steel construction.

4.5" Composite Angle Grinder

GA 1014.5

The GA 1014.5 is a 1.3 HP angle grinder with a 5/8" - 11 spindle for used with spin on hub abrasive wheels or type 27 wheels. The GA 1014.5 has a composite handle and a locking spindle for easy wheel changes. The unique adjustable guard lets you position the guard out of the way of your work and keep you safe.

7" Angle Grinder

GA 1007

The GA 1007 is a 2 HP angle grinder with an ergonomic handle design. Standard features include a safety throttle, locking spindle for faster wheel changes, full size guard to accommodate all type of abrasive wheels and a non slip rubber grip.

5" Composite Angle Grinder

GA 1015

The GA 1015 is a 1.3 HP angle grinder with a 5/8" - 11 spindle for used with spin on hub abrasive wheels or type 27 wheels. The GA 1015 has a composite handle and a locking spindle for easy wheel changes. The unique adjustable guard lets you position the guard out of the way of your work and keep you safe.

High Powered Straight Die

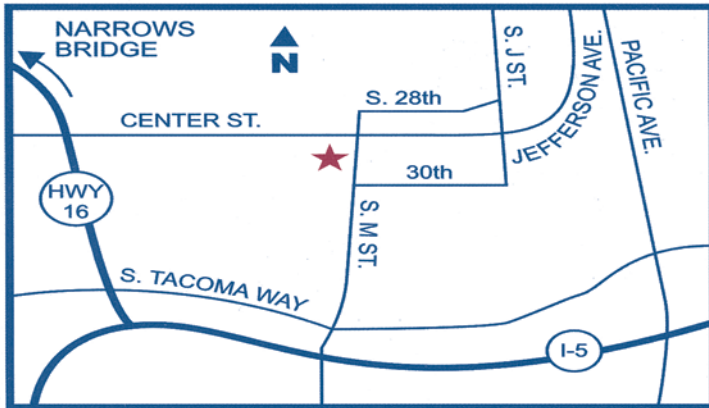

GAD 3001

The GAD 3001 is a powerful .7 HP die grinder with a 1/4" collet. All OPT die grinders come standard with a recessed to flat when depressed safety trigger and a patented external regulator on top feature. Comfortable non slip rubber grip and rotating air inlet.
